

WORK EXPERIENCE

- **FIL Industries Pvt. Ltd. Internship (1st June - 31st July, 2023) :**
Completed an internship with FIL Industries Pvt. Ltd. in their IT department and Accounts Department starting June 2023. Gained hands-on experience in real-world data analysis, teamwork, and enterprise communication in a professional setting. Learned to bridge academic knowledge with practical applications in a structured environment.

EDUCATION

- **MCA — Model Institute of Engineering and Technology, Jammu (2024:2026)**
- **B.Sc. (Hons) Computer Science — Lovely Professional University (2021:2024)**

PROJECTS

- **Blogify API** : Learned to build a scalable and modular backend using Node.js, Express, and MongoDB. Implemented JWT authentication, role-based access control, email verification, and smart middleware for filtering blocked users and protecting admin routes. My proudest moment was getting the entire system to work securely and cleanly — while keeping code DRY and well-separated across controllers, middlewares, and utilities.
- **Petsy**: Built a full-featured platform to adopt and care for pets. Frontend with React.js and Next.js; backend with Node.js, Express.js, and PayloadCMS; database using MongoDB, MySQL, and Appwrite. Features include authentication with Passport.js/NextAuth, chat messaging, product checkout, user profiles, and NGO support. Deployed on AWS and Appwrite.
- **Music School** : Leveraged React.js, Next.js, and TypeScript for a highly responsive frontend. Framer Motion brought life to transitions, while Daisy UI added clean aesthetics. Gained solid understanding of Next.js structure and third-party UI integrations.
- **Spring Boot BankApp (DevOps Implementation)**: Created a secure Spring Boot banking app with MySQL backend, containerized using Docker. Implemented DevSecOps best practices with CVE scanning (Docker Scout), secure non-root execution, and provided a documented security report. Used multi-stage builds and Docker Compose for optimized deployment.
- **LeetLab**: Building a competitive programming platform using Node.js, React, and Daisy UI. Integrating Judge0 for code execution. Focused on learning asynchronous patterns and secure API communication.

SKILLS

Frontend	React.js, Next.js, JavaScript, TypeScript, Daisy UI, Tailwind CSS, Framer Motion
Backend	Node.js, Express.js, Spring Boot, PayloadCMS, REST API development
Database	MongoDB, MySQL, PostgreSQL, Appwrite
DevOps	Docker, Jenkins, GitLab CI/CD, CVE scanning, Docker Compose
VersionControl	Git, GitHub, GitLab
Deployment	AWS, Appwrite
Soft Skills	Team collaboration, debugging under pressure, learning from failure
